

DILLON REFUSES TO MODIFY EGG ORDER

Commissioner Tells Mercantile Exchange Storage Goods Must Be Stamped.

PRICE UP 1 CENT A DOZEN

Gov. Whitman's Committee of 5 in Conference—New Form of Milk Graft.

John J. Dillon, Commissioner of the State Department of Food and Markets, refused yesterday to modify his order requiring the stamping of each individual cold storage egg after it leaves its original package. His refusal followed a visit to him by George A. Glynn, Gov. Whitman's executive auditor. Mr. Glynn, it is understood, brought assurances of the Governor's approval of Mr. Dillon's work and a request that the Commissioner furnish all information at his disposal and cooperate in developing legislation. Commissioner Dillon later went into conference with the State commission and the Mayor's food supply committee at George W. Perkins' office, 71 Broadway.

Two attorneys for the Mercantile Exchange, asking for a modification of Mr. Dillon's stamping order, said the exchange members would willingly obey an order that would permit the placing of refrigerator eggs in cartons after leaving their original packages and provided for the stamping of each and every carton only.

The Commissioner said his purpose in issuing the order was to prevent retailing cold storage eggs as fresh eggs—practice of many dishonest dealers—prompted by the high prices of fresh eggs—and he did not purpose to make any change in the order.

You can't fool people into believing that refrigerator eggs are fresh eggs when they can see cold storage stamped on them," Mr. Dillon said later. "Cold storage eggs are perfectly good eggs, but folks shouldn't be fooled into paying fresh egg prices for them. We want an order that will do something effective. If the lower courts will not stand by me in enforcing this order, I shall go to the Attorney-General of the State. If I am not backed up there I shall have a bill introduced in the Legislature and then we'll see what will happen."

Results of Price Inquiry.

Other happenings of the day in connection with investigations into the high prices of foodstuffs were:

The wholesale price of cold storage eggs advanced 1 cent a dozen over Saturday notwithstanding the city egg boycott, which began the third week of its existence to-day.

Announcement was made that Frank M. Swacker, Assistant United States Attorney-General, will start to-morrow the Federal Grand Jury investigation into the high price of coal, butter, eggs and poultry in this district.

Mayor Mitchell received at the City Hall 200 or more Socialists, men, women and children, who made a demand for municipal, State and Federal action looking toward a reduction in food prices.

Gov. Whitman's commission of five, headed by George W. Perkins, had a long session and conferred with the Mayor's committee on food supply and with Commissioner Dillon and Joseph Hartigan, Commissioner of Weights and Measures and Father of the Boycott.

Erik S. Lagerquist, superintendent of the Alexander Campbell Milk Company of Brooklyn, told the State legislative committee New York gets the best milk in the world and at too low a price.

Doctors Accused of Grafting.

Commissioner Dillon stood sponsor for the statement that the State Department of Health has received information from the State Department of Food and Markets that certain physicians make a practice of getting customers for milk companies, for which they are paid at the rate of from \$1 to \$2 for each new customer.

"I have supplied the State Department with the names and addresses of three or four physicians who have been getting paid by milk companies for obtaining new customers," Commissioner Dillon said last night. "This is the way they do it. They have a patient, perhaps a child. They say to the mother, 'Whose milk are you taking?' When they are told they say, 'You had better take mine.' Later they go to a telephone, call up the office of that milk company and tell them to send a can-wasser to Mrs. X's house. The can-wasser goes and gets a new customer. At the end of thirty days the physician gets a check for \$1 or \$2, depending on whether the new customer takes a quart or two quarts a day. It is a matter of fact that all physicians do this thing. Far from it. But I do say we have evidence that some doctors are doing it."

Mr. Perkins Outlines Plans.

Discussing the meeting of the Governor's market conditions commission, Mr. Perkins suggested this name is as good as any other. Mr. Perkins as chairman said: "We are going over plans, but cannot particularize any. We are inquiring into production, distribution and consumption of State, down State and Interstate. We are trying hard to find a place to plant our feet from which we can work."

Mr. Perkins in response to a question said his commission has not heard in any way from the Federal investigators. The State commission met in conjunction with the Mayor's Committee on Food Supply, whose research work into the food situation for the past two years, as well as the results of other inquiries, is at the disposal of Gov. Whitman's investigators.

It was learned that along toward the close of the session Commissioner Dillon and Judge George W. Ward, counsel to the State commission, had an interesting argument about terminal markets.

Terminal Market Idea.

Mr. Dillon, it is said, insisted that the establishment of a wholesale terminal market under State jurisdiction would go a long way toward solving the present difficulties. Judge Ward wanted to know if the Commissioner was anxious to force out of town the \$75,000,000 or \$100,000,000 represented by businesses that would be affected by such a market.

Commissioner Hartigan said yesterday his inspectors have obtained violations of law against kosher butchers in Manhattan and direction for all their weightings from five to six ounces on each chicken said.

"The practice of overweighing chickens immediately before the market," Commissioner said, "is one which has had the constant attention of the bureau."

He warned the public to examine carefully the chickens for abnormal crops before purchasing.

U. S. GRAND JURY PROBE.

Coal and Food Inquiry to Begin Here To-morrow.

Frank M. Swacker, Assistant United States Attorney-General, returned from

250 BEG MAYOR TO CUT COST OF LIVING

Men and Women With Pale Faces Beg in Their Arms Visit City Hall.

SAY: FEED AMERICA FIRST

Socialist Spokesman Urges Seizure of All Food Held by Speculators.

A delegation of 250 men and women—many of the women carrying thin, pale faced babies in their arms—appealed to Mayor Mitchell yesterday at City Hall to do something to lower the cost of living.

"Feed America first" was the slogan of some of the speakers, while Mrs. Theresa S. Malkiel, president of the Mothers' Association of Public School 170, said that because of the exorbitant food prices thousands of poor people in the city are in desperate straits.

"The mothers of this city cannot continue to bear children, they cannot guarantee a healthy race of offspring, unless something is done to keep them properly fed," she exclaimed earnestly.

Mayor Mitchell told the delegation that it was up to the State and Federal governments to take drastic action in the present situation. The city government, he said, could do little, but what ever can be done surely will be done, he said. He added that at the conference in this city next Friday of New York State Mayors he would offer a number of suggestions which if adopted may cause a reduction in food prices.

Socialist Heads Delegation.

The delegation was headed by Henry L. Stobodin, State chairman of the Socialist party; Joseph D. Cannon of the Western Federation of Miners; Joseph A. Whittehorn, Assemblyman-elect from the Twenty-first district; and Mrs. Malkiel.

Chairman Stobodin presented to the Mayor a petition containing a list of demands which he asserted must be put into force to bring down the cost of food. They included the following:

Seize all foodstuffs and coal held by speculators in the city.

Establish city markets to sell necessities of life at cost.

City to obtain coal mines, dairy farms and cattle ranches to supply the needs of the citizens.

City operated bakeries, butcher shops, milk and egg depots.

City owned terminal markets.

City to buy direct from farmers and sell in its own shops.

Luncheon for school children.

City to demand that Federal and State governments lower freight rates.

Prosecution of food pirates and famine manufacturers.

Embargo on Food Demanded.

Joseph D. Cannon declared that the United States should put an embargo on foodstuffs.

"We ask an embargo on food," he stated. "Not a complete embargo, but one that will guarantee that America will be fed first. What good does it do us to read that American ships are entering every port loaded to the water's edge with American exports if we have not enough at home? Let us keep what we need and let the rest go abroad. Let us feed humanity first, Mr. Mayor, not the dollar."

Mrs. Malkiel, whose declaration that thousands of children and mothers are undernourished by the pinched faces of the women and children present, made a long plea for the women.

"Mr. Mayor," she said, "we women are always placed last on these occasions. As you realize why these housewives and mothers are here to-day? It is because the burden they are carrying is too heavy. Really, Mr. Mayor, the cry of the children for bread is growing louder. Have you ever heard the cry of children for food? I would hope that no one might hear it, but these women hear it, and they hear it growing louder every day."

"The price of food and coal has gone up beyond our reach. I know of a case where a family has been forced to send one of the children to the butcher shop for 10 cents worth of cut meat, and the cat meat is eaten by the family."

Assemblyman-elect Whittehorn warned the Mayor that unless conditions were improved bread and meat riots would result.

"Laborers are working day after day," he said, "but they are not able to earn enough to purchase what food is required for their families. And let me tell you, Mr. Mayor, that men are not going to sit quiet while their wives and children starve to death."

The Mayor, in closing the audience, expressed deep sympathy for the poor and promised to continue doing all in his power to remedy conditions.

He said he would call a conference with the Mayor's food supply committee to-morrow.

WHO'S FIRST FEMINIST? WHY EVE, OF COURSE

Dr. Anna Howard Shaw Traces the Cult Back to Garden of Eden.

Ancient delights on the feminist movement were explained yesterday afternoon by Dr. Anna Howard Shaw for the benefit of members of the Institute of Arts and Sciences of Columbia University.

To get the proper angle of judgment, Dr. Shaw pointed out, it is necessary to go back to the Garden of Eden. It seemed a long way to go, but the scholars in her audience let her lead wherever she would.

"Judging from the manner in which most people speak of feminism," she said, "one would believe it had its origin in the last few years. In fact, it really had its beginning in the Garden of Eden, and Eve, the first feminist, took the first step toward feminism, the step which was to distinguish the human from other creatures assembled in that beautiful and peaceful place."

"In partaking of the tree of knowledge she placed a barrier forever between the upright human and all other animal life. This was the beginning of feminism, and although it has been overcome, retarded and sidetracked many times through the sex degeneracy of the female, nevertheless there has been ever present with women this aspiration."

Dr. Shaw declared that the feminist movement has suffered because it has been confused with sex license. She continued:

"Women will not approach and accept the duties of citizenship in the same spirit. There will be the over-aggressive and the sex dependent groups, but she said. He added that at the conference in this city next Friday of New York State Mayors he would offer a number of suggestions which if adopted may cause a reduction in food prices."

Proposes Niagara Rental.

Senator Thompson Wants New York to Get Income From Power.

WASHINGTON, Dec. 11.—Senator George F. Thompson of New York came to Washington to-day to urge the adoption of an amendment to the Niagara Falls power bill, providing for the payment of an annual rental of \$5 per horsepower to the State of New York for additional water that may be diverted from the falls for power purposes.

Senator Thompson had a conference with Representative Flood, chairman of the House Committee on Foreign Affairs. The latter approved of the plan of charging a rental of \$5 per horsepower to the State of New York for additional water that may be diverted from the falls for power purposes.
